Keith Mestrich, President and Chief Executive Officer of Amalgamated Bank, commented, "For almost 100 years, Amalgamated Bank has stood with companies, organizations and individuals that have led the charge to make a more just and sustainable world. Social responsibility is embedded in Amalgamated's history, policies, products, programs, operations and culture. Now more than ever, we need to act boldly in addressing the racism embedded in our society, including the private sector. As a result, and after long conversations both inside and outside of the Bank, we have outlined a series of near-term commitments and actions intended to drive tangible results over time. It will take time to drive meaningful change and we are committed to keeping this at the forefront of our work."

Mr. Mestrich, continued, "We have always believed that a Bank can do good in the world while also delivering profitable growth. Our second quarter results not only validate this view but further emphasize the value that we provide to our core customer base as can be seen in our average deposit growth of $\$ 606$ million during the quarter, or $50.5 \%$ on an annualized basis. Additionally, we have nearly doubled our West Coast deposits since acquiring New Resource two years ago. On the asset side of the balance sheet, we continue to grow our PACE portfolio, having effectively added $\$ 68$ million in PACE securities during the quarter. While the pandemic has negatively affected the cities where we have physical locations, our customer base has a geographic diversity that, along with our conservative underwriting, should benefit the performance of our loan portfolio. Lastly, the pandemic has allowed the Bank to benefit from higher levels of digital adoption, effectively obliging our customers to utilize our technology when the ability for in-person banking was not an option. This successful transition to online banking allowed us to close several of the Bank's branches earlier than anticipated. We expect to realize a one-time, non-core expense increase of approximately $\$ 6$ million in the third quarter as we exit the branches, however, moving forward, beginning in 2021, our non-interest expense is expected to benefit by approximately $\$ 4$ million annually."

## COVID-19 Update

Amalgamated's primary concern during the COVID-19 pandemic is for the health and wellbeing of the Company's employees, customers, and communities. Our employees continue to manage from a work from home environment, and our operations continue to perform well, effectively transitioning many customers to our digital platform, allowing for further consolidation of our branch network.

We have offered payment deferrals as an option for our consumer and commercial borrowers who are experiencing financial stress as a result of COVID-19 impacts. As of the week ending July 25,2020 , we have provided payment deferrals on the following amount of loan balances.

## Results of Operations, Quarter Ended June 30, 2020

Net income for the second quarter of 2020 was $\$ 10.4$ million, or $\$ 0.33$ per diluted share, compared to $\$ 9.5$ million, or $\$ 0.30$ per diluted share, for the first quarter of 2020 and $\$ 11.2$ million, or $\$ 0.35$ per diluted share, for the second quarter of 2019 . The $\$ 0.8$ million decrease in net income for the second quarter of 2020, compared to the second quarter of 2019, was primarily due to a $\$ 6.1$ million increase in provision for loan losses, partially offset by a $\$ 2.6$ million increase in net interest income and a $\$ 2.3$ million increase in non-interest income.

Core net income (non-GAAP) for the second quarter of 2020 was $\$ 10.6$ million, or $\$ 0.34$ per diluted share, compared to $\$ 9.2$ million, or $\$ 0.29$ per diluted share, for the first quarter of 2020 and $\$ 11.6$ million, or $\$ 0.36$ per diluted share, for the second quarter of 2019. Core net income for the second quarter of 2020 excludes $\$ 0.5$ million of non-interest income gains on the sale of securities, $\$ 0.7$ million in expense related to the closure of six branches, and other adjustments, including the tax effect of such adjustments.

Net interest income was $\$ 44.4$ million for the second quarter of 2020 , compared to $\$ 44.7$ million for the first quarter of 2020 and $\$ 41.9$ million for the second quarter of 2019. The $\$ 2.5$ million year-over-year increase was primarily attributable to a decrease in interest expense due to a decrease in borrowings and deposit rate paid, and an increase in average securities and loans of $\$ 509.5$ million and $\$ 383.9$ million, respectively with lower yields. These impacts were partially offset by an increase in average interest-bearing deposits of $\$ 340.4$ million.

Net interest margin was $3.10 \%$ for the second quarter of 2020 , a decrease of 36 basis points from $3.46 \%$ in the first quarter of 2020, and a decrease of 56 basis points from $3.66 \%$ in the second quarter of 2019. The accretion of the loan mark from the loans we acquired in our New Resource Bank acquisition contributed three basis points to our net interest margin in the second quarter of 2020, compared to four and six basis points in the first quarter of 2020 and the second quarter of 2019, respectively. Prepayment penalties earned through loan income contributed $\$ 0.2$ million, or two basis points, to our net interest margin in the second quarter of 2020, compared to six and three basis points in the first quarter of 2020 and the second quarter of 2019, respectively.

Provisions for loan loss expense totaled $\$ 8.2$ million in the second quarter of 2020 compared to $\$ 8.6$ million in the first quarter of 2020 and $\$ 2.1$ million for the second quarter of 2019. The provision expense in the second quarter of 2020 was primarily driven by a $\$ 3.2$ million increase in allowance related to payment deferrals in our loan portfolio, a $\$ 2.7$ million increase in specific reserves related to one hotel which was downgraded to non-accrual, and $\$ 1.5$ million related to downgrades to the risk rating of loans, primarily construction loans.

Non-interest income was $\$ 8.7$ million in the second quarter of 2020 compared to $\$ 9.1$ million in the first quarter of 2020 , and $\$ 6.3$ million in the second quarter of 2019. The $\$ 2.3$ million increase in the second quarter of 2020 , compared to the like period in 2019 , was primarily due to $\$ 1.3$ million tax credit on an equity investment in a solar project, a $\$ 0.5$ million gain on the sale of securities compared to a loss of $\$ 0.4$ million in the comparable quarter of 2019, and a $\$ 0.7$ million increase in Bank-owned life insurance income due to the receipt of a death benefit payout. These increases were partially offset by a $\$ 0.5$ million decrease in Trust Department fees primarily related to the decrease in revenue from a real estate fund which is liquidating assets.

Non-interest expense was $\$ 31.1$ million in the second quarter of 2020 compared to $\$ 32.3$ million in the first quarter of 2020 , and $\$ 31.0$ million in the second quarter of 2019. Expenses in the second quarter of 2020 were relatively unchanged compared to the same period in 2019. The $\$ 1.2$ million decrease in the second quarter of 2020 compared to the linked quarter was primarily due to a $\$ 1.3$ million decrease in branch closure expense in occupancy and depreciation and a $\$ 1.0$ million decrease in professional fees from external audit, subadvisors and consultants. These decreases were partially offset by an increase in data processing and other expenses of $\$ 0.7$ million and $\$ 0.5$ million, respectively.

Our provision for income tax expense was $\$ 3.4$ million for the second quarter of 2020, compared to a provision of $\$ 3.4$ million for the first quarter of 2020 and a provision of $\$ 3.9$ million for the second quarter of 2019 . Our effective tax rate for the second quarter of 2020 was $24.9 \%$, compared to $26.3 \%$ for the first quarter of 2020 and $25.8 \%$ for the second quarter of 2019.

The $\$ 2.1$ million decrease was primarily due to a $\$ 12.5$ million increase in the provision for loan losses and a $\$ 0.9$ million increase in non-interest expense, partially offset by a $\$ 6.5$ million increase in net interest income and a $\$ 4.0$ million increase in non-interest income.

These impacts were partially offset by an increase in average interest-bearing deposits of $\$ 273.4$ million.

## Non-GAAP Financial Measures

This release (and the accompanying financial information and tables) refers to certain non-GAAP financial measures including, without limitation, "Core operating revenue," "Core non-interest expense," "Core net income," "Tangible common equity," "Core return on average assets," "Core return on average tangible common equity," and "Core efficiency ratio."
Our management utilizes this information to compare our operating performance for 2020 versus certain periods in 2019 and to prepare internal projections. We believe these non-GAAP financial measures facilitate making period-to-period comparisons and are meaningful indications of our operating performance. In addition, because intangible assets such as goodwill and other discrete items unrelated to our core business, which are
excluded, vary extensively from company to company, we believe that the presentation of this information allows investors to more easily compare our results to those of other companies.

The presentation of non-GAAP financial information, however, is not intended to be considered in isolation or as a substitute for GAAP financial measures. We strongly encourage readers to review the GAAP financial measures included in this release and not to place undue reliance upon any single financial measure. In addition, because non-GAAP financial measures are not standardized, it may not be possible to compare the non-GAAP financial measures presented in this release with other companies' non-GAAP financial measures having the same or similar names. Reconciliations of non-GAAP financial disclosures to comparable GAAP measures found in this release are set forth in the final pages of this release and also may be viewed on our website, amalgamatedbank.com.

## Terminology

Certain terms used in this release are defined as follows:
"Core operating revenue" is defined as total net interest income plus non-interest income excluding gains and losses on sales of securities and gains on the sale of owned property. We believe the most directly comparable GAAP financial measure is the total of net interest income and non-interest income.
"Core non-interest expense" is defined as total non-interest expense excluding costs related to branch closures and restructuring/severance costs. We believe the most directly comparable GAAP financial measure is total non-interest expense.
"Core net income" is defined as net income after tax excluding gains and losses on sales of securities, gains on the sale of owned property, costs related to branch closures, restructuring/severance costs, and taxes on notable pre-tax items. We believe the most directly comparable GAAP financial measure is net income.
"Tangible common equity" and "Tangible book value" and are defined as stockholders' equity excluding, as applicable, minority interests, preferred stock, goodwill and core deposit intangibles. We believe that the most directly comparable GAAP financial measure is total stockholders' equity.
"Core return on average assets" is defined as "Core net income" divided by average total assets. We believe the most directly comparable performance ratio derived from GAAP financial measures is return on average assets calculated by dividing net income by average total assets.
"Core return on average tangible common equity" is defined as "Core net income" divided by "Average tangible common equity." We believe the most directly comparable performance ratio derived from GAAP financial measures is return on average equity calculated by dividing net income by average total stockholders' equity.
"Core efficiency ratio" is defined as "Core non-interest expense" divided by "Core operating revenue." We believe the most directly comparable performance ratio derived from GAAP financial measures is an efficiency ratio calculated by dividing total non-interest expense by the sum of net interest income and total non-interest income.
